NO WORK ON WEEKENDS AND HOLIDAYS ALLOWED BY THIS PERMIT

Permit Work Hours

Permit work hours are from **7:00 AM to 3:30 PM**, Monday through Friday (excluding holidays). Any work after 3:30 PM is subject to the overtime inspection rate. Any work outside of the permit hours must be submitted in writing a minimum of four (4) business days/permit hours in advance.

- **Permit is valid only within city right-of-way. Works on private property need owner's permission/consent.**
- **All pertinent ordinances apply. Paving works must be completed within 30 days from backfill if included in scope of works and must follow ordinance 1841.**

Temporary Street Closure

Temporary Street Closures require a separate permit and a minimum of 4 to 8 business days for processing. Prior to the start of any temporary street and/or lane closure, the applicant is required to notify and receive City approval a minimum of 72 business hours in advance. Business hours are Monday through Thursday from 8:00 AM to 5:00 PM.

Permit Fee Structure

The minimum fee for a Construction Permit is \$450.00 and is non-refundable. The minimum fee is for minor construction (usually for a utility tie-in for a single-family home). Projects that are more extensive require a review on a case-by-case basis.

Public Works Inspection Deposit (Defined)

Inspections are based on an hourly rate. Staff performs an audit when the Inspector finalizes a Construction Permit. This audit consists of deducting the Inspector's documented time (shown on their time sheet) from the deposit.

Permit Extensions

Each permit extension will be assessed a new processing fee. Refer to the Master Fee Schedule for current fees for each extension.

Extension fees will automatically be assessed until the Permittee provides written notification to the city that the construction and all associated activities have been completed and that the permit has been finalized / signed off by the Public Works Inspector.

Repair Requirements

Slurry seal to centerline will be required on all major roads, regardless of trench width or location. A compaction report will be required for parallel trenches every 100 feet in length. Additional striping will be required beyond trench to meet existing striping. No more than 15% RAP for new AC pavement per Greenbook.
