

# Tie-In of additional gas line to Meter.

**SUBJECT:** *Tie-In off additional gas line to meter.*

When it is necessary to tie-in additional house or yard line to outlet side of meter, the following methods should be used:

1. The “Tee” fitting labeled “A” is **NOT** to be used for tie-in. The gas company has a specific use for this “Tee”.
2. The “ELL” fitting labeled “B” can be substituted with a “Tee”, for tie-in.
3. The “ELL” fitting labeled “C” can be substituted with a “Tee”. This is probably the most practical place to tie-in.
